# Capture beautiful images in amazing high resolution

## The world's first<sup>1</sup> F2 all-in-one full-frame mirrorless zoom lens

The TAMRON 35-150mm F/2-2.8 Di III VXD (Model A058) is a high-resolution travel and portrait zoom lens that covers everything from 35mm wide-angle to 150mm telephoto focal length. It's the first zoom lens with an aperture of F2 at the wide-angle end for full-frame mirrorless cameras. It enables photography of beautiful natural landscapes, urban scenery, architecture, casual snapshots and more while traveling, and portraits at the most used focal lengths all without changing lenses. And for sharp, in-focus images it utilizes the linear motor focus mechanism VXD<sup>2</sup>, thereby achieving high speed, high precision autofocus.

The 35-150mm F2-2.8 enables photographers to shoot at the angles-of-view commonly used when creating art while traveling or during portrait sessions, empowering you to clearly capture the many image as you envision with overwhelming resolving power and magnificent overall performance.

Camera: Nikon Z8 Focal length: 56mm  
Exposure: F2.8 1/320sec ISO: 125

## Capture stunning close-up images easily

At the 35mm wide-angle end, the MOD (Minimum Object Distance) is 0.33m (13 in), producing a maximum magnification ratio of 1:5.7. In addition to boldly accentuating the subject, you can make it stand out by creating a beautifully blurred background utilizing the fast F2-2.8 maximum aperture. You can also take unique, one-of-a-kind photos, including overhead shots of food while traveling, and captivating close-up photography.

Camera: Sony α7R III Focal Length: 35mm  
Exposure: F2 1/2000sec ISO: 320

## Capture everything from wide-angle to telephoto with a single lens

This powerful zoom lens covers everything from the 35mm wide-angle to 150mm telephoto, including all the common focal lengths that are already familiar to you, giving you more creative options than ever before. At the 150mm telephoto end, this zoom is a fast F2.8, so you can make stunning images by intentionally limiting depth-of-field and leveraging beautiful bokeh. Seamlessly take photos without switching lenses. Change to the 85mm semi-telephoto focal length for a portrait, focus on a faraway subject at 150mm, and make full use of the 35mm and 50mm ranges for street, interior and other travel images. Change composition without changing your distance from the subject (a key ingredient of creative photography!).

Camera: Sony α7R III  
Exposure: F8 1/400sec ISO: 100

Camera: Sony α7R III  
Exposure: F8 1/500sec ISO: 100

## Proprietary software tool TAMRON Lens Utility™ for lens function customization

This lens is compatible with the new TAMRON Lens Utility software originally and uniquely developed by TAMRON. TAMRON Lens Utility can be operated using computer or smartphone by connecting the lens from its Connector Port via the optional TAMRON Connection Cable<sup>3</sup>. Users can customize the functions and update the firmware through the lens.

## New lens design improves both operation and ergonomics

The Model A058 incorporates a new design that becomes the hallmark of TAMRON lenses introduced in the future. Grip texture has been improved by redesigning the striped pattern on the rubber of focusing and zoom rings. The lens has been refined for smoother operation. The surface of the lens exterior is shiny black, much glossier than previous models. TAMRON considered customer feedback and reviewed each part and component of the lens down to the finest details.
