Experience the full power of Macro. Refined for higher detail and sharper photos.

SP 90mm F/2.8 Di MACRO 1:1 VC USD
for Canon, Nikon

SP 90mm F/2.8 Di MACRO 1:1 USD
for Sony

New 90mm Macro lens delivers superior image quality – incorporating state-of-the-art optical technology and image stabilization.

Model F004
Di (Digitally Integrated) lens designed for digital APS-C and full-size SLR cameras, with lens hood.
Compatible mounts: Canon, Nikon, Sony
*The Sony mount does not include VC, as Sony digital SLR bodies include image stabilization functionality.

www.tamron.com
State-of-the-art optical and image stabilizing technologies combine to create a new masterwork lens in the 90mm Macro.

Images of astounding sharpness, augmented by natural blur effects. Tamron’s classic 90mm Macro lens is reborn to let you shoot even more beautiful, exquisite images. Compatible with full-size SLR cameras, this new, high-resolution macro lens lets the photographer capture the moment’s atmosphere at will.

### High resolution with beautiful blur effects

Two XLD (Extra Low Dispersion) glass elements*1 made from specialized, high-grade glass and one LD (Low Dispersion) element are combined to thoroughly correct aberration. Moreover, the latest optical design and rounded diaphragm*2 deliver a spectacular blur effect. This macro lens maintains sharp focus on the subject together with soft natural blurring of foregrounds and backgrounds to achieve a richer, deeper feel in the image.

*1 The XLD glass has much lower dispersion, similar to fluorite, than the conventional LD element.
*2 This rounded diaphragm retains a nearly circular shape even when taken two stops down from its fully open state.

### VC (Vibration Compensation)*3

This macro lens is equipped with the VC mechanism that delivers sharp and vivid viewfinder images. Even in low-light situations, camera shake is reduced to enable stress-free hand-held photography.

*3 From 3m, the benefits of VC gradually decrease as the focus distance becomes closer.
