28-200mm F/2.8-5.6 Di III RXD (Model A071)

For Sony E-mount Di III: For mirrorless interchangeable-lens cameras

*Maximum aperture in zoom range among currently available all-in-one interchangeable zoom lenses with a zoom ratio of 7x or higher (As of May, 2020: Tamron)

Unprecedented blend of optical performance and versatility

New, innovative all-in-one lens that does it all

Focal Length: 28mm Exposure: F2.8 1/30sec ISO: 1250

All of Tamron's technical know-how regarding all-in-one zoom lenses has been distilled to create this 28-200mm F/2.8-5.6 Di III RXD (Model A071). The lens has a large maximum aperture of F2.8 at 28mm, a world's first* for all-in-one zoom lenses, and delivers high-level performance from 28mm wide-angle to 200mm telephoto. Although covering a wide range of focal lengths, the lens is lightweight and compact. Tamron has taken an uncompromising approach to optical performance, making liberal use of special lens elements—including LD (Low Dispersion) and XLD (eXtra Low Dispersion) lens elements—to greatly suppress chromatic aberrations, making it possible to achieve high image quality from edge to edge. This innovative all-in-one zoom lens vividly captures virtually all possible scenes, from landscape photography to portrait photos and snapshots.

Versatile lens does it all!

The 28-200mm F2.8-5.6 covers an expansive range of focal lengths from 28mm to 200mm. This empowers diverse photographic expression, from wide-angle shooting of sweeping landscapes to close-up and compressive compositions at telephoto. The compact design measures 117mm (4.6 in) and weighs 575g (20.3 oz) so it's easy to carry anytime, anywhere.

Focal Length: 28mm

Exposure: F8 1/750sec ISO: 100

Focal Length: 200mm

Exposure: F8 1/750sec ISO: 100

Close-up performance that's astonishing for an all-in-one zoom lens

Focal Length: 28mm Exposure: F2.8 1/320sec ISO: 100

At 28mm, the MOD (Minimum Object Distance) is 0.19m (7.5 in) with a magnification ratio of 1:3.1; at 200mm the MOD is 0.8m (31.5 in) with a magnification ratio of 1:3.8. Capture stunning close-up images and leverage the bokeh utilizing a large F-number and enjoy unique close-ups that were not possible with all-in-one zoom lenses until now.

Tamron offers a unified system of lenses with 67mm filter size

Combine the 28-200mm F2.8-5.6 with other members of Tamron's lineup of 67mm filter size lenses and cover an even wider range of scenes. The shared 67mm filter size enables efficiency in filter use; the same polarizer filters, or other filters, and lens caps can be shared between all models.
