28-200 mm F/2.8-5.6 Di III RXD

for Sony full-frame mirrorless

NEW

First all-in-one zoom starting at F2.8*

Unleashes the power of full-frame mirrorless cameras. Revolutionary lens offering performance plus versatility.

Maximize your creative potential

28-200mm F/2.8-5.6 Di III RXD (Model A071)

For Sony E-mount  Di III: For mirrorless interchangeable-lens cameras

*Maximum aperture in zoom range among currently available all-in-one interchangeable zoom lenses with a zoom ratio of 7x or higher (As of May, 2020: Tamron)
Unprecedented blend of optical performance and versatility

New, innovative all-in-one lens that does it all

All of Tamron’s technical know-how regarding all-in-one zoom lenses has been distilled to create this 28-200mm F/2.8-5.6 Di III RXD (Model A071). The lens has a large maximum aperture of F/2.8 at 28mm, a world’s first* for all-in-one zoom lenses, and delivers high-level performance from 28mm wide-angle to 200mm telephoto. Although covering a wide range of focal lengths, the lens is lightweight and compact. Tamron has taken an uncompromising approach to optical performance, making liberal use of special lens elements—including LD (Low Dispersion) and XLD (xXtra Low Dispersion) lens elements—to greatly suppress chromatic aberrations, making it possible to achieve high image quality from edge to edge. This innovative all-in-one zoom lens vividly captures virtually all possible scenes, from landscape photography to portrait photos and snapshots.

Versatile lens does it all!

The 28-200mm F2.8-5.6 covers an expansive range of focal lengths from 28mm to 200mm. This empowers diverse photographic expression, from wide-angle shooting of sweeping landscapes to close-up and compressive compositions at telephoto. The compact design measures 117mm (4.6 in) and weighs 575g (20.3 oz) so it’s easy to carry anytime, anywhere.

Close-up performance that’s astonishing for an all-in-one zoom lens

At 28mm, the MOD (Minimum Object Distance) is 0.19m (7.5 in) with a magnification ratio of 1:3.1; at 200mm the MOD is 0.8m (31.5 in) with a magnification ratio of 1:3.8. Capture stunning close-up images and leverage the bokeh utilizing a large F-number and enjoy unique close-ups that were not possible with all-in-one zoom lenses until now.

Tamron offers a unified system of lenses with 67mm filter size

Combine the 28-200mm F/2.8-5.6 with other members of Tamron’s lineup of 67mm filter size lenses and cover an even wider range of scenes. The shared 67mm filter size enables efficiency in filter use; the same polarizer filters, or other filters, and lens caps can be shared between all models.

Built with Mirrorless in Mind

Tamron’s new 28-200mm F2.8-5.6 is compatible with many of the advanced features that are specific to mirrorless cameras. This includes:
- Fast Hybrid AF
- Eye AF
- Direct Manual Focus (DMF)
- In-camera lens correction (shading, chromatic aberration, distortion)
- Camera-based lens unit firmware updates

* Features vary by camera. Please consult your camera’s instruction manual for details.

28-200mm F/2.8-5.6 Di III RXD (Model A071)

Model: A071
Focal Length: 28-200mm
Max. Aperture: F/2.8-5.6
Angle of View (diagonal): 75°23’-12°21’< for full-frame mirrorless format>
Optical Construction: 18 elements in 14 groups
MOD: 0.19m/7.5 in (WIDE) / 0.8m/31.5 in (TELE)
Max. Mag. Ratio: 1:3.1 (WIDE) / 1:3.8 (TELE)
Filter Size: φ67mm
Max. Diameter: φ74mm
Length: 117mm / 4.6 in
Weight: 575g (20.3 oz)
Aperture Blades: 7 circular diaphragm**
Min. Aperture: F16-32
Standard Accessories: Flower-shaped hood, Lens caps
Compatible Mounts: Sony E-mount
